THORSTEN HILLMANN KEYBOARD-SOUNDS

How to get your new sound into the Kronos

FREE · NOTHING TO INSTALL

Is your Kronos already full of your own sounds? No problem. With the free **Kronos PCG Toolbox** you add the new sound to your own file. Nothing is overwritten, and your original file stays unchanged.

1 Save your sounds on the Kronos

1. Plug a USB stick into the Kronos.
2. **Disk** mode → **Save** → choose **Save PCG**, leave all banks checked, give it a short name, save.
3. Only if you have your own samples in the Kronos: also copy the folder of your sample bank to the stick (the **.KSC** file, the **..._UserBank.KSC** file and the sample folder with the same name).

This backup is also your safety net: with it you can always go back to where you were.

2 Open the toolbox

Plug the stick into your computer (Mac, PC) or iPad. Open in your browser: **werkstatt.keyboard-sounds.com** and choose the tab **“Add a sound”**.

Your files stay on your device. Nothing is uploaded.

3 Four steps in the toolbox

1. **Choose the sound pack:** the file from your download (the .PCG or, for sounds with samples, the whole .zip).
2. **Choose your PCG:** the file from the stick from step 1. If the toolbox asks about your own samples, choose the folder of your sample bank.
3. **Check the slots:** the toolbox suggests free slots. With “change” you pick them yourself, just like on the Kronos.
4. **Add and save:** give it a short name (16 characters at most) and save the new file.

4 Back into the Kronos

1. Copy the new file to the stick. If it is a .zip: unzip it first, then copy everything inside.
2. On the Kronos: **Disk** mode. For sounds with samples load the **.KSC** first, then the new **.PCG**.
3. Done. The toolbox tells you in the last step where the new Combi is, for example “U-G 001”.

This is safe

- Your original file is never changed. You always get a new file.
- Used slots are skipped, nothing is overwritten.
- The toolbox checks the result before and after saving.

If something does not work

- **“No free slot”:** your file has no free slot left. Choose another bank with “change”.
- **“No wave sequence bank”:** not all banks were checked when you saved in step 1.
- **Sound stays silent:** load the samples (.KSC) before the PCG.
- Help: **keyboard-sounds.com/pages/contact**

For Korg Kronos and Kronos 2 (OS 3.x). Keep your old file until you have played everything.
